

Guess who's sharing your water?

Water Quality will never be a guess, when using Ozone Pure Water Systems.

The USO₃ is Tried & True -

Single faucet water purification system for drinking, food preparation, ice makers, & personal use.

USO₃ – Enhancing the natural beauty of your water

How confident are you about the quality of your water? What you don't know about your water could be harmful due to the contaminants commonly found in most tap water.

At Ozone Pure Water we have a natural way to treat your water, removing specific harmful contaminants while delivering great taste – just like bottled water but from the convenience of your kitchen sink.

This process is ozonation, which inactivates the contaminating compounds & organic matter without the use of hazardous chemicals. Ozone is a naturally occurring element & is often referred to as, "Active Oxygen". Our systems recreate nature's cleansing in a safe, compact & economical unit.

By using our easy to install, compact USO₃ system, you can have beautiful water effortlessly flowing from your kitchen tap.

USO₃ provides Bottled water directly from your faucet

Purchasing bottled water is a costly hassle that is no longer necessary. With a simple installation of our USO₃ system under your or on top of your kitchen sink, great water is waiting for your enjoyment at virtually no on going cost. No more wondering if the store-bought water is of lesser quality than you own.

With your USO₃ system, you have the confidence of knowing that your water is healthy, meeting or exceeding Safe Drinking Water Standards (SDWS) for tap & bottled water. All bottled water is ozonated, so why not ozonate your water at home. You will see & taste the difference in your water.

Healthy water begins with Ozone Pure Water

Your USO₃ system safely & automatically removes from your water:

- Chlorine odor & bad taste
- Bacteria
- Virus & cysts
- Bio slime & film
- Iron
- Manganese
- Sulfur

Heavy metals such as...

- Lead
- Mercury
- Copper
- Cadmium

Cancer causing agents such as...

- Chloroform
- Trihalomethanes

The USO₃ blows other water filtering systems out of the water

Filters become like high-rise nurseries from incubating various microbes. A water filter does not kill microbes & cannot purify the water, which allow microbes to grow & pass through to you.

Ozone kills bacteria by oxidizing the organic material in the bacterial membrane, which weakens the cell wall & causes cellular rupture. This causes the organism to die almost immediately.

Every drop of water is injected with ozone for complete "Active Oxygen" saturation. Unlike all other filter systems including RO (reverse osmosis), bacteria is unable to grow on, or pass through the filter. Our exclusive 4-in-one filter removes harmful & distasteful contaminants.

Water is never wasted as with other systems such as RO. RO's waste 2-4 gallons to make 1 gallon of treated water. This is a tremendous & unnecessary waste if you calculate water usage over the years.

Specifications

Ozone Dosage: 100 ppm
Weight: 10 lbs
Hz: 60
Watts: 3.3
Dimensions: 5w x 4d x 10h"
Voltage: 110v or 220v
Filter Life: 1-3 yrs
(conditions apply)

USO₃ Advantages –

- Fully automatic
- Compact
- No maintenance
- Portable
- Easy installation
- Silent
- No wasted water
- Environmentally friendly
- Close factory support
- Money Back Guarantee

You will have the assurance of safe drinking water for fractions of a penny per gallon. The USO₃ will pay for itself very quickly.

30-Day Money Back Guarantee

If you are not fully satisfied with your system we will refund your money. (some restrictions apply).

Your USO₃ comes with a one year parts & labor warranty.

About Ozone Pure Water

Ozone Pure Water Inc was the first company to develop small-scale ozone water treatment & purification systems. We have been a full service water treatment manufacturer & supplier since 1980...making the lives of thousands of people better through better water.

Our staff is fully trained in the latest ozone water treatment based technology – very experienced & well respected in the industry – authoring numerous ozone water treatment related articles that have been published in national trade journals.

Thousands of satisfied customers worldwide have relied on Ozone Pure Water Inc to solve even their most severe water problems.
